

AcroTracker™†

A free app for iPhone and Android devices

AcroTracker™

AcroTracker is designed to be an easy way to help you keep track of your acromegaly symptoms and injections.

† AcroTracker is not intended as a tool for diagnosing, managing, treating or curing a specific disorder or a specific identifiable health condition, and is not intended for patients solely on oral medications for acromegaly.

AcroTracker is designed to help you...

1 Track your acromegaly signs and symptoms

Track the severity of up to 5 symptoms every day.

2 Keep track of your injections

Record where you've injected recently so you can choose an appropriate site for your next injection to avoid skin problems such as soreness and lumpiness.

3 Set treatment reminders

Set alerts to remind you to take your next injection as prescribed.

4 Share your results with your doctor

Produce reports of your symptoms and injections to discuss with your doctor.

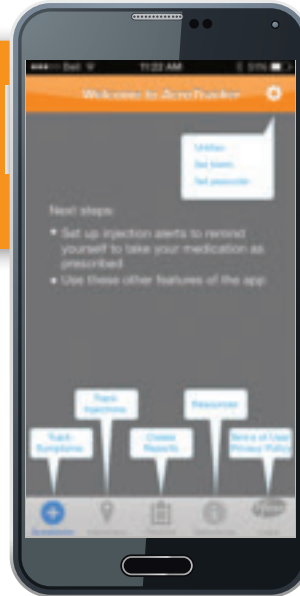

DOWNLOAD AcroTracker!

AcroTracker is a free app for your iPhone or Android device that lets you track your symptoms and injections.

Download AcroTracker by searching “AcroTracker” at the App Store.

Password: acro123

Tracking your symptoms and injections is an important part of treating your acromegaly.

- Track how your acromegaly symptoms are affecting you
- Track your injections to help you rotate your injection sites
- Use the app reports to have more productive conversations with your healthcare team
- Stay on top of treatments with injection reminders

Working together for a healthier world*
